

Internet Technologies

Lab Exam

Project Overview

Design and develop a **multi-page website** using **HTML5, CSS, and JavaScript**. The project will demonstrate your understanding of basic web design concepts.

1. Website Structure

- ❖ Create **at least 3 pages** (Example: Home, About, Contact)
- ❖ Connect pages using a **navigation bar (navbar)**

2. HTML Requirements

Your website must include:

- ❖ Headings (h1 → h6)
- ❖ Paragraphs
- ❖ Images
- ❖ Links (internal and external)
- ❖ Lists:
 - ✚ Ordered List (ol)
 - ✚ Unordered List (ul)
- ❖ Tables
- ❖ Forms:
 - ✚ Input fields (text, email, password, etc.)
 - ✚ Labels
 - ✚ Submit button

3. CSS Requirements

You must use:

- ❖ Inline CSS
- ❖ Internal CSS
- ❖ External CSS file
- ❖ CSS Selectors:
 - ✚ Tag selector
 - ✚ Class selector
 - ✚ ID selector

Include styling such as:

- ❖ Colors
- ❖ Fonts
- ❖ Spacing (margin, padding)
- ❖ Borders
- ❖ Navbar styling
- ❖ Background color

4. JavaScript Requirements

- ❖ Add **form validation**, including:
 - ✚ Required fields
 - ✚ Valid email format end with @azhar.adu.eg (Bones)
 - ✚ Password length check at least 8 char

5. Design Requirements

- ❖ Clean and organized layout
 - ❖ Easy navigation
 - ❖ Consistent design across pages
-
